LIFE INSURANCE

The following letter is a copy furnished by the General Manager of the Royal Bank of Canada to the Secretary of the Life Underwriters:

Montreal, August 11th, 1920

Dear Sir,—Replying to your letter of the 10th inst., in reference to the value of life insurance, I may say that our confidence in a borrower is always enhanced by the fact that he carries a life insurance policy. The wisdom of providing for unforeseen contingencies is an indication of conservatism. Partnership and individual insurance policies assigned to the bank as collateral security for advances, have frequently saved the bank from loss when there was no other visible source of repayment, and saved the man's family from the stigma of debt. Yours truly,

E. L. Pease, Managing Director.

Freight and Passenger Rates Increased

Will go into Effect next Monday

OTTAWA, Sept. 7.—By virtue of a judgement which will be signed from the offices of the board of railway commissioners, railway companies in Canada are granted an increase of 10 per cent in eastern Canada freight rates, effective on Monday next, September 13, and to continue in force until December 31.

After December 31 the increase in freight rate in eastern Canada is reduced from 10 percent to 25 percent, and in western Canada from 25 percent to 30 percent. This increase is applicable to all freight commodities with the exception of those which are expressly stipulated in the tariffs, and for which special provisions are made.

Simultaneously with the increase in freight rates, passenger rates all over the country are advanced 20 percent, so long as they do not exceed four cents a mile. This increase is effective only to December 31. After that date, and for the six months period from January 1, 1921, to July 1, 1921, a 10 per cent increase is authorized; following July 1, passenger rates return to those in force at the present time.

Make it the Best Ever Held in Didsbury

Wednesday and Thursday of next week are the days set for the Didsbury fair. The success of the fair depends upon you. Make your exhibits ready and have them in early, also bring all you can. The management has been working hard to provide amusement and entertainment for young and old and are desiring of much credit. If everyone will turn out and boost, it means that a better fair can be held next year. The Agricultural Society is an organization which is an asset to the community and is of mutual benefit to all residents of this district, consequently it should receive unlimited financial and moral support. "Come and try."

Opening of fall millinery at Mrs. Peterson's, Saturday, September 11.

Stunt Flight at the Fair

In connection with Capt. McCall's attendance at the fair next week for passenger carrying, the management of the fair hopes to be able to put on a stunt flight during the afternoon. This flight will consist of all the stunts which an aeroplane can perform, such as loops, spins, nose dives, side slips, etc., and Capt. McCall guarantees it will be a real thriller. The management will have to guarantee a sum of \$50 for this exhibition, and they propose making a collection on the grounds for that purpose. It is hoped that every one will help out with this part of the program as it no doubt will be the big feature of the fair.

NOTICE

The following classes have been added to the prize list of the Didsbury fair:

Class 5, Sec. 10, dry mare or gelding.

Class 25, Buff Leghorns, hen, cock, cockerel and pullet.

Class 28, Sec. 6, should read one half dozen instead of one half bushel.

Some applies to mangolds.

All entries close Tuesday, September 14th.

Opening of fall millinery at Mrs. Peterson's, Saturday, September 11.

Stand Up For the Law

Recent events in Canada, both east and west, point to the necessity of great care being exercised, not so much by the authorities, perhaps, as by the people in general to safeguard one of the Dominion's finest traditions and at the same time protect the liberties of the citizen.

Canada has long been recognized throughout the world, and especially in the great republic to the south, as a country where law was respected and obeyed, where even-handed justice was administered to high and low, rich and poor alike, and where sooner or later the long arm of the law would get the guilty. In the United States, where so many murderers escape just punishment for their crimes, where the law's delays are almost interminable, and where, as a result of a lack of public confidence in the machinery of justice, lynchings are not infrequent, the reputation borne by Canada was an invaluable asset. It is an asset Canada cannot afford to lose, nor allow to be lessened.

A few weeks ago, however, a group of men in southern Saskatchewan took the law into their own hands and drove a labor agitator out of the country, threatening him with tar and feathers if he returned. On August 16, at Thorold, Ont., a mob stormed the town jail and finally set fire to it in an effort to take a prisoner from the officers of the law in order that they might execute him themselves, although he had not yet been found guilty of the crime of which he was accused. Fortunately, common sense and an appeal to British fair play was effective in restraining the passions of the mob before it took the irrevocable step.

People, however, must be on their guard against such exhibitions and acts, if Canada is not to suffer in the eyes of the world, and the rights and liberties of its own people placed in jeopardy. Even in the earlier days when the west was "wild and woolly" and at the time of the great stampede to the Yukon, law was maintained and respected so effectively as to call forth the admiration of all countries. It is as necessary as ever that it should continue to be maintained. The world has passed through a great war when human life seemed to be the cheapest commodity in the world, and as a result many people do not look upon the take of human life as seriously as of old. But the old conception of the sacredness of human life must be fully re-established, and it is the duty of all citizens to assist by precept and practice to such restoration, and to oppose by all legitimate means in their power anything that tends to weaken and destroy confidence in the law.

The maintenance of law and order is the foundation of any organized state. Without respect for law, and lacking order, society could not exist, all property would soon cease to have any value, family ties would be dissolved, and human life ultimately be the plaything of the murderer and assassin.

Do away with law, and respect for it—which, of course, would follow the non-enforcement of law—and disorder would reign supreme. All mankind would revert to only one law—the law of the jungle, the law that might is right and must will prevail.

Every man and woman realizes in their innermost beings that this is

true, and that the whole organism on which human society rests has been evolved and erected because of general acceptance of the absolute necessity of a state of law and order. Mob rule is evil and vicious in the highest degree.

The maintenance of order rests absolutely in respect for and the upholding of the law. And the upholding of the law—which, after all, is but the concrete expression of the will of the majority of the people—is dependent upon respect for and unqualified support of those who are appointed to administer the laws which the people through their elected representatives have enacted for the common good and protection of all.

There can be only one outcome resulting from a loss of public confidence in the administration of justice in this country, and through the acts of the people taking the law into their own hands—law will be superseded by license; anarchy will replace order. Life and property will become playthings of the passions of men, and all those precious liberties and that freedom, to defend and maintain which our heroes, soldiers died and suffered in their hundreds of thousands, and which alone can be maintained under a system of law and order, will be destroyed, and a state of disorder and chaos prevail.

Every person who joins in or cheers on a mob is undermining the very foundations of that law which is his own safeguard and the protection of his family and his property.

SUMMER HEAT
HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat thrives the little stomach out of order so quickly that unless promptly aid is at hand the baby may be beyond all remedy before another cold catches he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer another's best friend is Baby's Own Tablets. They regulate the bowels, soothe the stomach and help the body to get rid of the poisons. Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Make a Pound of Honey

It is Clear That the 'Busy Bee' is Well Named

The Manchester Guardian quotes experts as saying that this is to be a good season for honey, and it adds that many people will welcome the news, though few realize the enormous effort a single pound of honey necessitates on the part of the bees. "In a pound jar," the Guardian explains, "there is the concentrated essence of over 60,000 flowers." It is calculated that to make a pound of clover honey the bees must take nectar from 62,000 blooms and make 2,750,000 visits in the process. Often the journey from the hive to the flowers and back runs to two miles, so that the making of a pound of honey entails journeys aggregating over 5,000,000 miles. When it is remembered that a single colony of bees will produce from sixty to eighty pounds of honey in a season it is clear that the 'busy bee' is well named."

U. S. History at Oxford

From Oxford comes the interesting note that Viscount Rothermere has offered to Oxford University through the chancellor, on certain specified conditions, a sum of \$100,000 for the establishment and endowment of a professorship of the history of the United States of America, to be styled the Harold Vyvyan Harmsworth Professorship of American History in memory of his son, Capt. 150 Year Old Grape Vine

At Hampton Court, London, in one of the greenhouses is the famous vine planted in 1768 by "Capability" Brown, a famous landscape gardener of the eighteenth century. The vine is the Black Hamburg variety. The fruit in recent years has been good, but this season the number and quality of the bunches is rather above the average. The girth of the area is five feet at the base. Several years ago twelve bunches of fruit from the wonderful vine were shown at a Royal Horticultural Society exhibition and the combined weight was 42 pounds.

SHORT OF BREATH?
Could Hardly Walk
Without Resting.

When you go to a physician to be examined for any heart trouble one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected, there comes a feeling of choking, sensation of shortness of breath, palpitation, throbbing, irregular beating, smothering, sensation, dizziness and a weak, sinking, all-gone feeling of oppression and anxiety.

On the first sign of the heart becoming weakened or the nerves unstrung Milburn's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

Mr. Stephen Crouse, East Clifford, N.S., writes: "I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Milburn's Heart and Nerve Pills and I felt better after taking them three boxes and am quite well. I am now helping my son to work the farm, and can truthfully say I feel like a different man."

POLISH TROOPS ARE IMPROVING THEIR POSITION

RED ARMY IS DRIVEN BACK

Bolsheviks Forced to Retire Along A Wide Section of Front

Paris.—Warsaw now seems to be saved from the Bolsheviks. President Pilsudski's armies no longer are obliged to fight a defence battle and are now on the offensive, was the news reaching here from the Polish sources, and the Reds are pausing before attempting to develop their successes. The offensive on the left wing is being personally led by the French generals, Henry and Biliotte, and already has yielded several hundred prisoners. Once more this will put the Poles in possession of the fork between the Narva and Bug Rivers, while the forces advancing towards Mlawa, which have reached Tschelchoff, 12 miles to the south of Mlawa, will force Bolsheviks marching towards Plock and Thorn to beat a hasty retreat and consequently regain the road-line to Danzig.

But the manoeuvre on the right wing, along the line of Garvolin and Paratichoff, between the Vistula and the Bug, is the more interesting of the two from the strategic standpoint, because it threatens communications with Red forces.

These troops have just arrived from the Brest-Litovsk region, and have made rapid headway and have driven the Reds back all along the line toward Brest-Litovsk for distances varying from 15 to 30 miles.

Moscow.—Soviet Russia's position on both the Polish and South Russian fronts was pronounced "generally satisfactory" by Leon Trotsky, Bolshevik minister in an address here. The speech was delivered at a meeting of the Moscow soviet.

Discussing the military situation, Trotsky declared that the front against White Poland, our Red troops have fulfilled the fundamental part of their task. The holding up of our advanced troops before Warsaw in no way alters the situation, as the Polish front is now divided into parts—military and diplomatic—and involves two centres, one in Warsaw and the other in Minsk.

The peace negotiations at Minsk are of exceptional importance," continued the war minister, "because they are developing on the unstable foundations of a stormy movement among the workers. Great Britain, also, is passing through an unheard of display of excitement among her workers in connection with the peace negotiations between Russia and Poland.

On General Wrangel's front," he added, "We are opening the gate wide to our enemies, but we shall assault them in the flank and rear. The fate of the revolution will be decided on the Polish front. This is why we have continued our forces in the west and are only leaving posts on the southern front in connection with the campaign, just to keep Wrangel busy."

Shipping Lines Want Increase

Involving Approximately Sixty U. S. Steamship Lines

Washington.—Great Lakes, Coastwise and gulf carriers, urged the United States shipping board to grant applications involving approximately sixty steamship lines for rate increases in connection with the advances already allowed the railroads by the inter-state board of commerce. A majority of the lines are now operating at deficits which threaten their existence, it is said. H. E. Mangum was told by witnesses. Representatives of shippers are now being heard. Owing to the short time until increased railway rates become effective, efforts are being made to expedite the hearings.

Munitions Are Barred

Brussels.—The Belgian state railwaymen's syndicate has decided to prevent the transportation to or through Belgium of troops or munitions intended for Poland. This decision follows similar action by Antwerp dockers.

Says Trahmen Not Exploiting Public

Explain That Five-Hour Day Is Not Equivalent to Eight-hour Day of Industry

Toronto.—Declaring that certain evidence regarding the "five-hour day" as given before the Dominion railway commission in connection with the application for increases in freight rates has been misunderstood, and used to make it appear that the strongly organized trainmen, by their demands, have been exploiting the public, and are reported for the further rate increase, a statement has been issued by the executive of the unions.

The principal contradictions are as follows:

1. The basic five-hour day for passenger engineers is not equivalent in any way to the eight-hour day in industry. It is a minimum guaranteed day measurement, for special occasions, very seldom used. The general rule is that engineers in the passenger service are paid on a mileage basis. Their hours of work are most irregular, often extending from twelve to eighteen hours on a single trip.

2. There is not a great deal of overtime in the wages of trainmen, engineers operating passenger trains do not get time and a half for overtime. The only men who receive it are the trainmen and engineers on the flow freight service, which is not the general rule.

3. It is true that time as well as mileage is one of the factors that determine pay, and that delay is sometimes paid for, but this is only on special occasions, and it is untrue to say that there is any inducement for engineers to run slow or to strive for delays. The inducement is all for getting on time.

4. The present salaries for engineers run from \$200 to \$250 a month. Their hours are usually very long and irregular, and they are the poorest paid of the highly skilled mechanics, according to the men engaged in that kind of work.

Manifesto to Workers

Says Danger of War With Russia Is Not Over

London.—The "Council of action" of the British labor party, after a long discussion, issued a new manifesto to the workers of Great Britain declaring that the danger of war was not over.

"This," the manifesto says, "is not the time to be deceived by seeming fair words. Why does not the Premier announce the terms on which England will make peace with Russia? Why is the position with regard to the adventures of General Wrangel submerged?" The manifesto demands a full peace, together with a resumption of trading with Russia and exhorts the workers not to relax their efforts in this direction.

The council has not yet received any word from William Adamson and Harry Gosling, representatives of the council of action, who went to Paris to confer with the labor federation and the executives of the United Socialist party.

For Strike Leaders' Release

Deputation Headed by F. J. Dixon Pleads Cause of Prisoners At Ottawa

Ottawa.—Pleading the cause of the imprisoned Winnipeg strike leaders, a deputation headed by F. J. Dixon, leader of the Laborites in the Manitoba Legislature, waited upon two members of the government. It is understood their plea was to the effect that the recent election in Winnipeg demonstrated the people's confidence in the imprisoned men, and served to show that the bulk of public opinion is behind the attitude of the men in forcing a general strike, also that few people believe the imprisoned men had any seditious intentions.

Friends of the imprisoned men here believe that there is every prospect of an early release for the men.

CLAIM RAILWAY IS FACING A HEAVY DEFICIT

AN INTERESTING DISCUSSION

Counsel Suggests There a Less Need For Increased Rates In the West

Ottawa.—An interesting development in the hearing before the railway commission of the application of the Canadian railways for increased freight rates and passenger rates occurred when H. J. Symington, counsel for the government of Manitoba, threw out the suggestion that in view of the fact that operating expenses are lower and earnings higher on western C.P.R. lines, the same necessity does not exist for an increase of rates in the west.

Mr. Symington had been examining W. J. Moule, assistant controller of the C.P.R. at length on the cost of operating in the east and west it being shown that during the past four years net operating expenses in the west are lower than in the east, and the net earnings per train mile are higher, those for 1910 being approximately eighty per cent higher.

"Would you say in view of the figures," asked Mr. Symington, "that freight rates increases should be the same in the west as in the east, if the increase is to be upon the basis of paying money for services rendered?"

Mr. Moule, in reply, said that the operating expenses in the east are largely incurred for the benefit of the west. These include large expenses for port terminals, etc. For this reason, he said, operating rates are not a proper indication of the earnings on eastern and western lines. Expenses in the east of this kind were not, he said, spread over the entire system.

"Is not more traffic originating in the west for the long haul?" asked Mr. Symington.

Mr. Moule: "I suppose it is."

"Even so," interposed Chief Commissioner Carvell, "does it not have to be transported over one thousand miles of waste country?"

Mr. Symington remarked that it was strange that the Lake Superior C.P.R. division was one of the best paying divisions of the C.P.R.

Commissioner McLean compared the Superior division to a bridge which must be maintained, and Mr. Carvell said that without it, production in the west would not amount to much.

Mr. Symington remarked that the west originates most of the traffic and to this Chairman Carvell agreed, "If it were not for the west," he observed, "that section of the railway would not be there at all." He added that it would take a powerful argument to convince him that it was a paying piece of railway.

Earlier in Mr. Symington's examination Mr. Moule, he emphasized the movement of wheat from the west, contrasting the ratio with other commodities.

Mr. Moule said that while it was not necessarily so, the cost would come down as the density of traffic increased till the point was reached where the line would become choked.

"It costs less to move grain on the prairies than any other traffic," asked Mr. Symington.

"Yes, but we have a very low rate on it," Mr. Moule replied.

The fight throughout the entire sitting was centred on the statement submitted last week by the C.P.R. and designed to show the need of that company for higher rates if it is to be prevented from having a deficit during the year which will end June, 1921. In that statement it was shown that the C.P.R. faces a possible deficit of over thirty-seven millions of dollars if the existing scale of rates is continued in force.

Finishes Trip to Dawson

Dawson.—H. Kinderley, son of Sir Robert Kinderley, governor of the Hudson's Bay company, has arrived here accompanied by T. P. O'Kelly. They left Edmonton early in the summer, travelled the full length of the Mackenzie river to Fort McPherson and by way of the Porcupine to this city. They are leaving by stage for Vancouver by way of White Horse and Skagway.

Gruesome Discovery In Hudson River

Headless and Limbless Body of A Woman Is Found By Longshoreman

New York.—The torso of an unidentified woman with head, arms and legs chopped off has been found in the Hudson River.

Clinging to the skin were shreds of clothing of fine material and minute pieces of wrapping paper. This indicated, according to the police, that before being cast into the river the torso had been wrapped in heavy underwear or a blanket and this in turn covered with heavy wrapping paper and bound with strong cord. The police explained the operation that the package probably had been weighted down, but that water had rotted the wrappings and the torso allowed to come to the surface.

Medical officers claimed that it had been in the water about two weeks. The police believe that the woman was about 25 or 30 and weighed about 130 pounds.

Vancouver Airman Killed

Loses Life in An Accident Over English Bay

Vancouver, B. C.—In the sight of his wife and many hundreds of people on the beach, Bert Brenton, purchasing agent for the Union Steamship company of British Columbia, either jumped or fell to his death in the water of English Bay when the seaplane he was piloting became unmanageable and crashed into the sea.

Before the actual fall an explosion was heard and smoke was noticed near the engine and the seaplane turned over seven times in its descent. The machine was brought to shore by a tug and a search is being made for the pilot's body.

Brenton was about a mile out at sea when the accident occurred. He had made a flight over the city previously. He was an experienced aviator, having seen active service overseas, being a captain in the Royal Air Force. He is the last of three brothers, the other two having been killed overseas.

E. H. Beasley, general manager of the same company, was killed in an airplane accident at Minors park a few months ago.

FRANCE AND U.S. AGREE ON RUSSIAN POLICY

CASE OF GENERAL WRANGEL

Both Countries Agree in Condemnation of the Bolsheviks

Washington.—The United States and French governments are in active agreement in regard to the future of both Poland and Russia, according to state Colby said, in interpreting France's recent condemnation on the Wrangel case.

France's declaration "of its opposition to the dismemberment of Russia is most gratifying," Mr. Colby said, and added, that "the response is a notable declaration from every viewpoint and brings to the position taken by the United States a striking emphasis and powerful support."

The secretary of state also said that regarding recognition of Gen. Wrangel, "there was a divergence between the two governments, but the United States was disposed to regard the declared agreement of France with the principles of the United States as of more significance than any divergence of policy involved in the specific action of France in this single respect." He declares that France is of the same opinion as the United States "concerning the present rulers of Russia, and points to condemnation of the Bolsheviks in language almost identical with that employed in the United States note to Italy."

SAVE THOSE HIGH-PRICED MACHINES

An unprotected binder has only a working life of 180 days—and so it is with all other machines. An actual depreciation of 15 to 25% when left to the weather. When housed properly the depreciation is reduced to the ordinary wear and tear caused by the work.

An implement shed that contains housing for your machines, a tool room and a garage would be the ideal compact arrangement for the protection and upkeep of your machines. This is a precaution that pays handsome reward to the farmer.

BUILD NOW

See the many plans for up-to-date implement houses at your nearest lumber dealer. He is fully equipped to render every assistance in the planning of your buildings. He has plans, working drawings and full particulars. His assistance is free. Most dealers have a splendid book of 100 pages on "Better Buildings" of which they'll be pleased to let you have a copy. WEDNESDAY, SEPT. 1, 1920

Great Britain has wonderful co-operative powers. She has already paid in the form of taxes and war contributions about twenty billion dollars, or 26 per cent. of her total war expenses. The mind can scarcely grasp the war cost to the British government. In six years fifty six billion dollars were expended. Some idea of what this outpouring of treasure means may be gathered from the fact that it amounted to more than the total cost of running the government during the previous 225 years, including the mounting of eight wars and many little ones. All though her debt has soared tremendously in recent years, Great Britain is no worse off today than she was at the close of the Napoleonic period. — Calgary Herald.

NINTH SEMI-MONTHLY CROP REPORT OF THE DEPT. OF AGRICULTURE

By H. A. Craig, Deputy Minister
Since the previous report issued on August 15th, harvesting weather has been particularly favorable. The weather has been comparatively cool with bright sunshine. This has been ideal for flax and ripening.

Reports from the south and central parts of the province indicate eighty per cent. of the grain cut, excluding green feed. Through the northern parts of the province fifty to sixty per cent. of the wheat is cut and cutting of oats and barley well under way. Flax crops have suffered in various places but no serious damage has been reported up to time of writing, which means that practically all the wheat is past the stage where it can be damaged and the greater portion of oats and barley are sufficiently well advanced to ensure a good sample. There is not sufficient threshing done yet to form an estimate of yields based on actual threshing returns, but the yield will be heavy and the sample good, but wages are higher than usual.

"Just arrived in time, nurse, delay might have lost us our patient. No doctor can afford to take chances with his motor. Imperial Polarine and Imperial Premier Gasoline saves every motor run perfectly. We can always rely on Imperial products."

You Can Depend On It

EVERY drop of Imperial Polarine is 100% lubrication. It spreads a protecting cushion of oil between all wearing parts, making each part function smoothly and reducing wear to a minimum.

It has exactly the right body—forms a perfect piston-to-cylinder seal, maintains compression, conserves power and saves fuel. It does not break down or run thin under extreme heat.

Imperial Polarine burns clean, reduces carbon deposits to a minimum and assures long life, smooth running and reliability to your motor at all times, under all conditions.

There is an Imperial Polarine grade for every motor need, from crank shaft to differential. Consult the Imperial Polarine Chart of Recommendations for the correct grade to use in your car—it is on display wherever Imperial Polarine is sold.

Sold in one and four gallon sealed cans, steel kegs, half barrels and barrels, by dealers everywhere in Canada. Buy in large containers and save money.

Love of The Wild

ARCHIE P. MEKISHINIE
Frigited by Special Arrange-
ments with Thos. Allen,
Toronto, Ont.

(Continued)

As they approached Declute's home which was a house of logs close to the shore of Round Bay, a couple of wire-haired mongrels came yelping out to meet them.

"There's David and Goliath," said Ander. "Rachel named them dogs. She's great on Bible names. Is Rachel—too damned great?" he finished in a lower key.

Gloss opened the door and stepped inside. Mrs. Declute turned slowly from the table and a smile spread across her face-struck face.

"Oh, you dear!" she said, pounding forward and imploring a warming snack on the girl's rosy cheek. "You little dear, to come just now of all times, when I must first wait to see you."

Mrs. Declute smiled again and a bit of powder fell from her face. It was a big, matronly face, with big, heart-shaped wrinkles about across it, and real kindness beaming in its large black eyes. She was a big woman, "nigh two hundred and thirty," as Ander put it.

"Where are babies?" asked Gloss, sitting down on a stool and glancing about the small room.

"Sleepin' like angels, th' trouble-some little good-for-nothin's," smiled the woman fondly. "Moves is just that trouble-some. I think sometimes I'll have to tie him up. Only this mornin' he upset the candle and spilt little Martha out on the door-knob. Give my life if I wasn't so provoked I could have leached him if he hadn't been just gettin' over the jaundice."

"Ander tells me that you are thinkin' of havin' a loggin'!" said Gloss. "Is there anything I could do to help you, Mrs. Declute?"

"Just what I was wantin' to see you about," cried the beaming woman, sitting down and wiping her face with her apron. "Thought first as I'd run across to Tedderside and ask widdie Ross to come over. Then I thought about her havin' that teacher boardin' there, and I didn't want to put her out any. Fine widdie is the widdie, but somehow I can't think as anybody can cook meals and serve 'em up quite like you, Glossie. I'm fixin' up some dried apple pies. Sent over to Hinfington this mornin' by Jim Peeler for the doctor's samples. I guess he'll be along soon."

"He's comin' right now," called Dr. Clare from the door. "I'll go along and give him a hand, I guess. He's got some tobacco for me—leaves I hope he had I want for some."

"Ain't that a man for you?" winked Mrs. Declute. "Ain't that a man, though? Glossie, my dear, don't you ever marry a man, don't you ever do it. You'll be sorry all the days of your life if you do. Even I am almost sorry sometimes, an' Ander's an exception of a man. Ther ain't no other like him. And sakes alive, he's had enough, dear knows."

Ander and a short, heavy-eyed man entered, and the latter laid a number of parcels on the table. He had a jolly round red face with crow's feet about the corners of brown eyes, stamped there by much smiling. It was said of Jim Peeler that he had never been known to lose his temper. He stood a short rifle in the corner and sat down near the table. Mrs. Declute arose and brought a steaming tea-tray from the hearth, also a plate of bread and cold meat.

After disposing of a goodly portion of the victuals before him, Jim turned to Gloss with the question:

"How's the sick?"

"No better," answered Gloss, her face growing grave.

"Dear me, how thickers I am!" exclaimed Mrs. Declute. "I knowed

There was something I wanted to ask you, Gloss. That's it. How's th' dear little woman?"

Ander was cutting off a piece of black chewing-tobacco from a tin, and

"Why don't you tell old Betsy 'bout her?" he asked.

"Shut up, Ander!" barked his wife. "Be you a Christian, or be you a heathen as believe in widies?"

"There, there," laughed Peter scornfully. "I guess Ander is a good Christian. But I was talkin' to a real Christian today; a real pious, rights down good man."

"Snythe?" questioned Declute, the piece of tobacco poised halfway to his expectant goal.

"The same," answered Peter. "And by the way, I met that man Watson as I was comin' home. He must have been over here, eh?"

"He was here this mornin'," said Gloss. "He was tryin' to—buy our place?"

"Oh, was he?"

Peter's face lost its smile and his bushy eyebrows set in a scowl.

"How about you, Ander?"

Declute squirmed.

"Oh, I ain't thinkin' much about it, Jim. I ain't worryin' none."

His wife eyed at him contemptuously.

"You ain't brains enough to worry about anything," she exclaimed. "Was that Watson ridin' alone, Jim?"

"Well, no, he wasn't. That teacher chap was with him. He was ridin' the hay belon'ing to Hallibur's neighbor."

Gloss looked up, her eyes wide.

"Then they were together?" she asked.

"Yes," replied Peter. "I suppose the teacher was swim' him through part of the bush. I was talkin' to Blake, the sawyer, over at the mill a while ago, and he tells me Colonel Hallibur has hired Snythe and Watson to help get our timber-land."

"Whereabouts on the trail did you meet 'em?" asked Declute.

"Why, they had only got nicely started I guess. It wasn't more than two or three miles out at most."

"Where had Watson been all day, I wonder?" cried Gloss. "He was at our place shortly after sun-up."

From the next room came a commotion, and three round-eyed youngsters, between the ages of three and six, protruded their heads from beneath the buckskin door-curtain.

"Get back in thar, Moses and Zeecheous," commanded the mother; "You ain't had half enough sleep yet."

"Oh, let me hug them, Mrs. Declute!" pleaded Gloss.

She ran across and gathered the babies up, all together, in her arms. They twined their chubby arms about her neck and rubbed their sleepy eyes against her face. They were sweet-wholesome youngsters, and the girl loved them. She kissed them all, three times around, then set them down.

"Guess we'd better be goin'," Ander, she said, "that is, if you have to come. But I'm not the least bit id about goin' alone."

"Course he'll go," declared Mrs. Declute. "And you too, Jim Peeler, 'cause I've got to get on with them pies. Tell Libby the bet's next Thursday, and I'll wait her to help

with the table. Much obliged for your kindness, th' Goodnight, Glossie!"

CHAPTER IX

"Gloss! I'll see them to the edge ridge here and look in on Bill Peeler for a minute or so," said Jim Peeler, as the three found the path leading to the creek.

"He's smug," his wife said, smiling close. "Hark, can't you hear him?"

Upon the tree-trunk of Round Bay a red dish, of a smug was dripping gold and amethyst glory and all the wild-wood was full of life and harmony.

From the thickets the hardest of the songbirds were bidding goodbye to the wood. It was their last night in the old nesting-place.

Mingled with the symphony came Paisley's voice, trilling happily:

"Massara's gone away, de darkey say, 'Ho, ho!'"

"Must be now dat de kingdom's comin'!"

"I de year ob jubilee!"

"He's a happy beggar," chuckled Declute. "He's a happy beggar, is Bill, and the biggest-hearted, softest-hearted babe of a man as ever lived."

"God built some big things," said Peeler; "that," waving toward the yellow glory above, "this" looking about him "an' Bill. Yes, He built Bill, and nobody has ever spoiled His work."

(To be continued.)

He Ought to Know Better

"There is no use trying to joke with a woman. The other day Jones heard a pretty good comedian and decided to try it on his wife."

"Do you know why I am like a smile?" he asked her when he went home.

"No," she replied promptly. "I know you are, but I don't know why you are."

The Russian Soviet

Moscow is the Centre of the Power Of Bolshevism

Development of the Soviet government in Russia has been such that today the vast Russian territory, from the Pacific to the Baltic, is divided into three distinct sections in the attitude of the people toward Bolshevism.

In a recent 4,000-mile trip across the entire country, all the way from Vladivostok to the Finnish border, the Associated Press correspondent observed that Soviet support diminished with increasing distance from the capital at Moscow, where the supreme fairs for iron-clad militarism are issued.

In the remote eastern section of Siberia, the Bolshevik admit failure to establish their system and are seeking to create a buffer state known as "The Far Eastern Republic." Siberia proper, from Irkutsk to the Urals, where eight months ago Bolshevism was welcomed as a relief from the Kolchak regime, is ready for another change to anything which will bring economic betterment.

Home bread-making reduces the high cost of living by lessening the amount of expensive meats required to supply the necessary nourishment to the body. The increased nutritious value of bread made in the home with

ROYAL YEAST CAKES

should be sufficient incentive to the thoughtful housewife to give this important food item the attention to which it is justly entitled. Bread made with Royal Yeast will keep fresh and moist longer than that made with any other.

Lusitania May be Raised

Newspaper Protests Against Disturbing This Monument to German Outrage

They say that the Lusitania may be raised from her grave on the ocean floor—that it is practicable to hoist the gloomy hulk, with her freight of death and memories, to the surface and the sunshine, where she floated when the torpedo drove home. What purpose would be served in breaking the sleep of those who rest with the Lusitania—the great ship that suffered outrage and became a cause celebre, a symbol of retributive justice against Germany? Irrevocably she should be the property of that very sea that swallowed her, the same that was to be cursed by vengeful destroyers sinking the submarines. When the Lusitania sank she became a surety, held in trust by the ocean, that thereafter the seas should not be stained by murder. The shattered liner holds memory with a firmer grip, there on the floor of the sea, than if she cruised again. And an unimpaired memory of the Lusitania is worth the keeping.—Portland Oregon.

Wage increases ranging all the way from 50 to 100 percent are being sought by trainmen of the Canadian Pacific railway, western division, and the men this morning began to press their claims before the board of railway conciliation in Winnipeg.

PALLID CHEEKS MEAN ANAEMIA

New Health Can be Obtained by Enriching the Blood Supply

When a girl in her teens becomes peevish, listless and dull, when nothing seems to interest her and duties do not tempt her appetite you may be certain that she needs more good blood than her system is provided with. Before long her pallid cheeks, frequent headaches and breathlessness and heart palpitation will confirm that she is anemic. Many mothers as the result of their own girlhood experience can promptly detect the early signs of anemia and the wise mother does not wait for trouble to develop further, but at once gives her daughter a course with Dr. Williams' Pink Pills, which renew the blood supply and banish anemia before it has obtained a hold on the system.

Out of their experience thousands of mothers know that anemia is the sure road to worse ill. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anemic girl, every pain she suffers in her back and limbs are reproaches if you have not taken the best steps to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills.

New, rich, red blood is infused into the system by every dose of these pills. From this new rich blood springs good health, an increased appetite, new energy, high spirits and perfect womanly development. Give your daughter Dr. Williams' Pink Pills, and take them yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicine or by mail postpaid at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Vegetable Stew

Use equal quantities of vegetables, onions, carrots, turnips and potatoes. Take one-quarter pound of butter and brown it slightly. Place in fireproof earthenware vessel with vegetables all sliced, and let simmer for one-half hour. Add pepper and salt to taste. Fill the vessel with water enough to cover vegetables, and let simmer in the oven or on the stove for two hours, or even less, so long as it simmers. This has the flavor of lamb stew.

How to Pop Corn

It is done in different ways, but the most approved method is to pop your corns with Putnam's Corn Extract—corns pop out for fair, and stay out, too, when removed by "Putnam's." Try this painless remedy yourself, 25c. at all dealers.

Want to go Over Niagara Falls

Applications from nearly thirty men and women have been received by the mayors on both sides of the Niagara river asking for permits to go over the falls. They are being told that they will not be allowed. Meantime, Bobby Leach, who successfully performed the feat some years ago, advertises that he will go over August 29.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Cure is within the reach of all.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will cure a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, cure the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself, and can be got for a quarter of a dollar.

Mrs. L. Herman and Mrs. H. W. Gable spent Sunday and Labor Day with Mrs. Henry Hossmann at Dog Pond and report having had a most enjoyable time.

Mr. S. T. Severson, manager of the Rosebud Hotel, having gone on a vacation for two months, handing big game, the hotel will be managed by Mr. Alf Smith, whom we are sure will treat his guests and the public at large with every courtesy. All we wish Alf is the best of luck.

THIS IS THE SORROWFUL STORY

Consider now the editor. Yes, consider the editor: He wears a purple and fine linen. His abode is amongst the mansions of the rich. His wife has her limousine and his first born sports a racing car that can hit her up in 30 flat.

Let the people breaketh their necks to hang him money. A child is born to the wife of a merchant in the bazaar. The physician getteth ten golden plunks. The editor writteth a sick and a half and tetheth the multitude that the child tippeth the beam at nine pounds. And the ploud father giveth him a Cremo.

Behold the young one groweth up and graduateth. And the editor putteth into his paper a swell notice—yes, a peach of a notice. He tetheth of the wisdom of the young woman and of her exceeding comeliness. Like unto the roses of Sharon is she, and her gown is played up to beat the band. And the dress maker getteth two score and four iron men. And the editor getteth a note of thanks from the sweet girl graduate.

The daughter goeth on a journey. And the editor throweth himself on the story of the farewell party. It runneth a column solid. And the fair one remembereth him from afar with a picture postcard that costeth six for a Jitney.

Behold, she returneth, and the youth of the city fall down and worship. She picketh one and lo, she picketh a lemon. But the editor callteth him one of our most promising young men and getteth away with it. And they send unto him a bid to the wedding feast and behold, the bids are printed by Montgomery Haw, back in a far city.

Flowery and long is the wedding notice which the editor printeth. The minister getteth ten bones. The groom standeth the editor off for a 12 month subscription.

All flesh is grass and in time the wife is gathered unto the soil. The minister getteth his bit. The editor printeth a death notice, two columns of obituary, three lodge notices, a cubit of poetry and a card of thanks. And he forgetteth to read the proof on the heading and the darn thing cometh out: Gone to Her Last Roasting Place.

And all that are akin to the deceased jumpeth on the editor with exceeding great jumps. And they pulleth out their ads and cancellteth their subscriptions, and they swing the hammer unto the third and fourth generations.

Can thou beat it?
